goal motivation, and happiness. This inquiry-based approach is organized around a compelling question and provides a complete outline, including formative and summative questions and assessments, as well as extensions that share this vital learning with parents. This book was written to help children understand the concepts of change, loss, farewells, and endings. It was also written to encourage children to discuss their thoughts and emotions about these events with parents and teachers. It contains beautifully illustrated examples of 'Goodbye' moments that children can identify with. The calming colours and gentle, reassuring words, combine to help children understand that loss is a part of life. When we say goodbye, it's ok to feel sad, but the memories remain in our hearts and minds forever. The characters in the illustrations tell a story, can you discover what that is? What does the balloon represent? All is revealed at the end of the book. Happy reading!

Developing Children's Critical Thinking through Picturebooks

This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing children to the notion of making-meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion, and shows how they can constitute an accessible, multimodal resource for adding to literacy skills, while at the same time developing in pupils a far wider range of literary understanding. By allowing time for thinking about and digesting the pictures as well as the text, and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking, and visual literacy, while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom practice. This book also provides an overview of recent international research on doing 'interactive read alouds', on what critical literacy means, on what critical thinking means and on picturebooks themselves. Lecturers on teacher education courses for early years or primary levels, classroom teachers, pre-service education students, and all those interested in promoting critical engagement and dialogue about literature will find this an engaging and very insightful text.

Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic

Online instruction is rapidly expanding the way administrators and educators think about and plan instruction. In addition, due to a pandemic, online instructional practices and learning in a virtual environment are being implemented with very little training or support. Educators are learning new tools and strategies at a quick pace, and often on their own, even through resistance. It is important to explore lessons learned through the pandemic but also of importance is sharing the virtual classroom options and instruction

that align to best practices when transitioning to online instruction. Sharing these will allow educators to understand and learn that virtual instruction can benefit all, even when not used out of need, and can enhance face-to-face courses in many ways. The Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic is a critical reference that presents lessons instructors have learned throughout the COVID-19 pandemic including what programs and tools were found to be the most impactful and useful and how to effectively embed virtual teaching into face-to-face teaching. With difficult choices to be made and implemented, this topic and collection of writings demonstrates the learning curve in a state of survival and also lessons and resources learned that will be useful when moving back to face-to-face instruction as a tool to continue to use. Highlighted topics include the frustrations faced during the transition, lessons learned from a variety of viewpoints, resources found and used to support instruction, online learner perspectives and thoughts, online course content, and best practices in transitioning to online instruction. This book is ideal for teachers, principals, school leaders, instructional designers, curriculum developers, higher education professors, pre-service teachers, in-service teachers, practitioners, researchers, and anyone interested in developing more effective virtual and in-classroom teaching methods.

Play Therapy with Traumatized Children

INTRODUCING A PRACTICAL MODEL OF PLAY THERAPY FOR TRAUMATIZED CHILDREN
Some of the most rewarding work a therapist can do is help a child recover from a traumatic event. But where to begin? A growing body of play therapy literature offers many specific techniques and a variety of theoretical models; however, many therapists are still searching for a comprehensive model of treatment that incorporates solid theoretical constructs with effective play therapy interventions. Clinicians have long recognized that trauma therapy is not just a matter of techniques but a journey with a beginning, middle, and end. In a pioneering contribution to the field, *Play Therapy with Traumatized Children: A Prescriptive Approach*, the author codifies the process in her model, Flexibly Sequential Play Therapy (FSPT). Integrating non-directive and directive approaches, this components-based model allows for the uniqueness of each child to be valued while providing a safe, systematic journey towards trauma resolution. The FSPT model demystifies play-based trauma treatment by outlining the scope and sequence of posttraumatic play therapy and providing detailed guidance for clinicians at each step of the process. Dramatically demonstrating the process of healing in case histories drawn from fifteen years of clinical practice with traumatized children, *Play Therapy with Traumatized Children* addresses: Creating a safe place for trauma processing Augmenting the child's adaptive coping strategies and soothing his or her physiology Correcting the child's cognitive distortions Ensuring that caregivers are facilitative partners in treatment Inviting gradual exposure to trauma content through play Creating developmentally sensitive trauma narratives Using termination to make positive meaning of the post-trauma self

Never Work Harder Than Your Students and Other Principles of Great Teaching

Some great teachers are born, but most are self-made. And the way to make yourself a great teacher is to learn to think and act like one. In this updated second edition of the best-selling *Never Work Harder Than Your Students*, Robyn R. Jackson reaffirms that every teacher can become a master teacher. The secret is not a specific strategy or technique, nor it is endless hours of prep time. It's developing a master teacher mindset—rigorously applying seven principles to your teaching until they become your automatic response: Start where your students are. Know where your students are going. Expect to get your students there. Support your students along the way. Use feedback to help you and your students get better. Focus on quality rather than quantity. Never work harder than your students. In her conversational and candid style, Jackson explains the mastery principles and how to start using them to guide planning, instruction, assessment, and classroom management. She answers questions, shares stories from her own practice and work with other teachers, and provides all-new, empowering advice on navigating external evaluation. There's even a self-assessment to help you identify your current levels of mastery and take control of your own practice. Teaching is hard work, and great teaching means doing the right kind of hard work: the kind that pays off. Join tens of thousands of teachers around the world who have embarked on their journeys toward mastery. Discover for yourself the difference that Jackson's principles will make in your classroom and for your students.

Language Teachers' Narratives of Practice

Language Teachers' Narratives of Practice is a collection of seventeen essays that examine personal and professional stories of, and by, language teachers in diverse Australian contexts. The voices of twenty-one Australian language teachers in all, describe teachers' own linguistic and cultural, personal and professional narratives, and how each narrative has informed the construction of their classroom language teaching practice to suit their teaching contexts. We see how teachers make individual responses to emerging pedagogies, developed through the lens of their personal experience and understanding of language and culture. In our invitations to these teachers to contribute chapters to the book, we have encouraged them to make visible the diversity within the Australian language teaching context. This is a new resource for use in a professional development context, for pre-service teachers, in-service teachers, tertiary teacher educators and researchers. This resource will serve as a practical text for teachers to draw on, to extend their own professional knowledge and classroom practice in relevant, useful and diverse areas. The narratives can be examined as case studies of teacher identity and life-worlds, development of pedagogies, intercultural learning, and the differentiation and adaptation needed in particular environments, within a diverse environment such as Australia.

Clinically Based Teacher Education in Action

Teacher education in the United States is changing to meet new policy demands for centering clinical practice and developing robust school-university partnerships to better prepare high-quality teachers for tomorrow's schools. PROFESSIONAL DEVELOPMENT SCHOOLS (PDSs) have recently been cited in national reports as exemplars of high-quality school-university partnerships in the clinical preparation of teachers. According to the National Association for Professional Development Schools, PDSs have Nine Essentials that distinguish them from other school-university collaborations. But even with that guidance, working across the boundaries of schools and universities remains messy, complex, and, quite frankly, hard. That's why, perhaps, there is such diversity in school-university partnerships. For the last thirty years, educators have been fascinated yet puzzled with how to build PDSs. *Clinically Based Teacher Education in Action: Cases from PDSs* addresses that perplexity by providing images of the possible in school-university collaboration. Each chapter closely examines one of the NAPDS Nine Essentials and then provides three cases from PDSs that target that particular essential. In this way, readers can see how different PDSs from across the globe are innovating to actualize that essential in PDS development. The editors provide commentary, addressing themes across the three cases. Each chapter ends with questions to start collaborative conversations and a field-based activity meant to propel your PDS work forward.

Teaching Is a Privilege

New teachers have a high attrition rate, often due to concerns about classroom discipline, interactions with parents, meeting the diverse needs of students, and pressures of high academic standards. *Teaching Is a Privilege* offers beginning teachers twelve essential understandings necessary to meet these challenges and thrive in the classroom. The understandings are based on a core belief that teaching is a privilege worthy of continuous, thoughtful self-reflection and compassionate treatment of children and their families. The result is higher teacher morale and higher-achieving students. The book focuses on development of the relationship side of teaching—attitudes, perceptions, beliefs, and behaviors—which builds trust and translates into a positive

classroom climate. The intention is to inspire new teachers to begin their professional lives with an informed, optimistic belief system that deepens their understanding of what is possible and then to provide them with ways to get there. The twelve essential understandings serve as the foundation of their teaching practices and ultimately lead to happy, high-achieving, respectful students, and an exemplary, personally satisfying teaching career.

He Forgot to Say Goodbye

"I mean, it's not as if I want a father. I have a father. It's just that I don't know who he is or where he is. But I have one." Ramiro Lopez and Jake Upthegrove don't appear to have much in common. Ram lives in the Mexican-American working-class barrio of El Paso called "Dizzy Land." His brother is sinking into a world of drugs, wreaking havoc in their household. Jake is a rich West Side white boy who has developed a problem managing his anger. An only child, he is a misfit in his mother's shallow and materialistic world. But Ram and Jake do have one thing in common: They are lost boys who have never met their fathers. This sad fact has left both of them undeniably scarred and obsessed with the men who abandoned them. As Jake and Ram overcome their suspicions of each other, they begin to move away from their loner existences and realize that they are capable of reaching out beyond their wounds and the neighborhoods that they grew up in. Their friendship becomes a healing in a world of hurt. San Antonio Express-News wrote, "Benjamin Alire Sáenz exquisitely captures the mood and voice of a community, a culture, and a generation"; that is proven again in this beautifully crafted novel.

Advances in Teacher Emotion Research

Some reports estimate that nearly 50% of teachers entering the profession leave within the first five years (Alliance for Excellent Education 2004; Ingersoll, 2003; Quality Counts 2000). One explanation of why teachers leave the profession so early in their career might be related to the emotional nature of the teaching profession. For example, teaching is an occupation that involves considerable emotional labor. Emotional labor involves the effort, planning, and control teachers need to express organizationally desired emotions during interpersonal transactions. As such, emotional labor has been associated with job dissatisfaction, health symptoms and emotional exhaustion, which are key components of burnout and related to teachers who drop out of the profession. Research into emotional labor in teaching and other aspects of teachers' emotions is becoming increasingly important not only because of the growing number of teachers leaving the profession, but also because unpleasant classroom emotions have considerable implications for student learning, school climate and the quality of education in general. Using a variety of different methodological and theoretical approaches, the authors in this edited volume, *Advances in Teacher Emotion Research: The Impact on Teachers' Lives*, provide a systematic overview that enriches our understanding of the role of emotions in teachers' professional lives and work. More specifically, the authors discuss inquiry related to teachers' emotions in educational reform, teacher identity, student involvement, race/class/gender issues, school administration and inspection, emotional labor, teacher burnout and several other related issues. This volume, then, represents the accumulation of different epistemological and theoretical positions related to inquiry on teachers' emotions, acknowledging that emotions are core components of teachers' lives. *Advances in Teacher Emotion Research* takes an eclectic look at teacher emotions, presenting current research from diverse perspectives, thereby making this volume a significant contribution to the field.

Helping Children To Say Goodbye

According to statistics, seventy percent of all UK schools have a bereaved child on roll at any one time. But despite findings such as these, an alarming divide appears to exist in the pedagogical world between the ideologies of providing effective pastoral care and the drive to exceed academic attainment levels; in arguable favour of capitalist gain. Whilst teachers may be unfairly accused of potentially neglecting the welfare of children within their care, other leading factors such as the restrictions on school budgetting and the evolution of governmental ideals should not be overlooked. This research project will therefore investigate the extent of which teachers are prepared as a result of training to meet the needs of bereaved children and young people in their care and whether existing training provision; in itself, is adequate enough in meeting the diverse needs of today's generation.
